

CourseScape

The first course management system to empower instructors, educators, and corporate trainers to intuitively create rich web content for students in minutes without programming

Rich and interactive content creation including buttons, dropdowns, listboxes, checkboxes, movies, and sound

Universal PDF content format assures content looks identical on all operating platforms

Students can review, study and markup content offline with eBook Reader

Cut and paste content from most any program including PowerPoint, Word, PhotoShop, SmartDraw

Design your own content or use anything you already have on your computer

Create content with or without an Internet connection
