Instantly using any Web Browser

## A Single Solution to Capture and View Reports AND Scanned Documents and Images

Advanced Image Router software sends documents scanned from multiple locations to central server for processing

Most documents handled automatically via state of the art OCR and Forms Recognition engines. No Indexing or Verification required in most cases.

Advanced options allow routing of images and/or data via email or fax

Up to 10,000 documents/day with basic configuration using minimal hardware

Cost effective and highly scalable

Minimal user training

Cost effective with Predictable ROI

A Single Solution for Scan, Capture and Distribution

Process.....

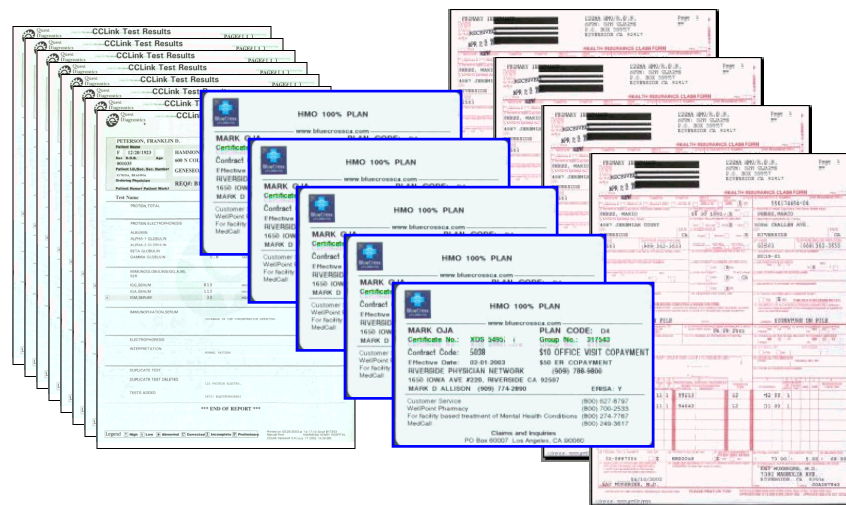

Patient Forms

Lab Reports

Insured ID Cards
